**Description**

- **Coordinator:** University of Salamanca – GRIAL
- **Starting date:** 01/01/2012  **Ending date:** 31/12/2013
- **Main objective** is to articulate the activity flow involved in the integration of informal learning as part of an individual’s development; this starts with the identification by the learner of informal learning activities and the subsequent process in which these are made visible to the institution. This will be done by developing methodologies and tools that facilitate this process, making it transparent both to learners and institutions and allowing all involved to make the most of these processes.

**Results**

- Definition and application of methodologies and recommendations for the integration of informal learning in educational institutions and the workplace
- Establishment of the technological framework (ILC, Portfolio Component, Competence Catalogue and Institutional Environment)
- Set of pilot actions
